

# Outsourcing fleet management?

Internal transport is a vital component of many companies. However, it is never the main goal of an organization. But it is for PIT.

How many companies still own passenger cars? Not many. Who wants to deal with unforeseen costs anymore? Why shouldn't that apply to your internal transport equipment as well? Make a switch to PIT, first in fleet management.

How does it work?:

- Our specialist conducts a comprehensive fleet analysis without obligation.
- You receive a detailed summary.
- You receive a proposal with a multi-year lease plan.
- Together, we determine the best approach for your logistics operation and evaluate it annually.
- Your fleet is managed by a team of specialists.

## How does PIT optimize your internal transport?

### Can you see 5 years ahead?

DO YOU HAVE FULL INSIGHT INTO YOUR INTERNAL TRANSPORT?

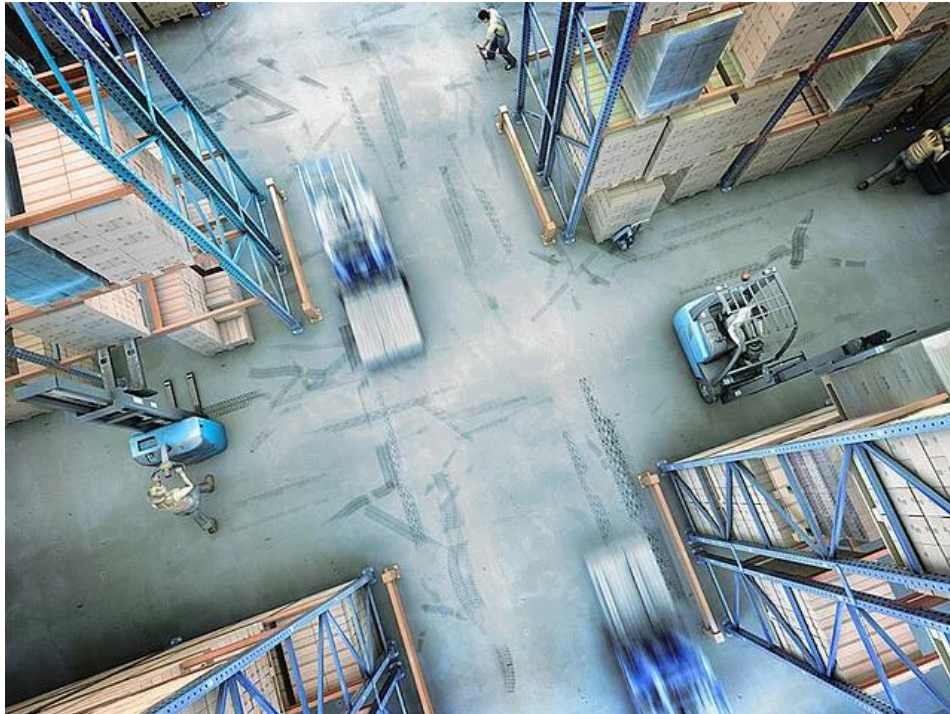

PIT ensures fewer headaches and more overview. All your fleet matters are centrally managed. Successful organizations move with the market and continue to evolve. Managing your fleet yourself shouldn't be a burden but should adapt to the activities of your organization. With PIT, you bring fleet management in-house, gaining more overview and fewer unplanned costs. You outsource your current internal transport to PIT. PIT will manage your fleet through a flexible leasing concept. You free up money for your company. How? Simple: PIT buys your fleet and leases back exactly what you need. This creates space on your balance sheet, in your warehouse, and on your desk.

## Savings guaranteed

Costs for purchasing, repairs, servicing, and management of your fleet are often fragmented. Costs due to damage and downtime are even more difficult to track. PIT has a systematic approach to analyzing the entire fleet, planning, and setup.

- PIT maps out the Total Cost of Ownership
- Clear comparison of current costs
- Fleet costs adjust with business activity

**Always an optimal fleet at the best price!**

## PIT takes care of everything

PIT provides brand-independent fleet management solutions throughout Europe. Tailored to your needs. In practice, this means that we take all the worries about your internal transport equipment off your hands. We handle planned and unplanned service tasks promptly for you. And you are always assured of the productivity of your internal transport.

PIT goes beyond the standard portfolio of well-known internal transport providers.

In addition to the well-known brands, there is room in our (and therefore your) fleet for special equipment.

Think of fully customized objects, explosion-proof machinery, cleanroom (stainless steel) versions, aerial platforms, or sweepers. PIT takes care of that for you too.

## Benefit from PIT too

Many national and international organizations have already chosen PIT. They have been enjoying the comfort of PIT for quite some time. All the benefits in one place:

- One dedicated contact for all your internal transport matters
- Transparent costs
- Brand-independent fleet management
- Optimal logistical flexibility
- Full concentration on core activities
- Off-balance internal transport costs
- Peace of mind
- Expert maintenance
- Annual fleet scan for savings
- Peak moments? Extra rentals are always possible
- Cost flexibility
